

# COMPETING WITH APPLE, SAMSUNG IS GOING TO RELEASE THE NEXT GALAXY NOTE IN EARLY SEPTEMBER

firstpost 9 3 Galaxy Note 4

According to firstpost news, Samsung is going to release its [next generation flagship phone](#)—Galaxy Note 4 on September 3.

9 “good idea” 9 iPhone Galaxy Note 4

In order to seize the market in September, Samsung decides to release its flagship phone in early September, which is totally a “good idea”. It is reported that Apple is also about to launch its new iPhone in September. And as the largest Smart phone manufacturer, Samsung wants to weaken its competitor’s power in market and go ahead of Apple to win the competition by Galaxy Note 4.

Galaxy Note 4 5.7 OLED 2560×1440  
Exynos 5433 805 Note 4 3GB Galaxy  
Note 4 1600 OIS Android 4.4.3  
KitKat

In the aspect of configurations, Galaxy Note 4 will carry a 5.7-inch OLED display with 2560×1440 resolution. In addition, Samsung will release two

versions of Note 4 that respectively adopt its own Exynos 5433 processor and Qualcomm Snapdragon 805 processor, but both have 3GB RAM. Meanwhile, Galaxy Note 4 will be equipped with a 16 MP camera that supports optical image stabilization. Furthermore, it will employ a UV sensor and run on Android 4.4.3 KitKat.
