

About the client:

This is an import and export corporation which built their plastic bags factory in Shenzhen of Guangdong province and runs several decentralized branches which performed its own duties.

In fact, one of its branches who runs a E-shop is in sore need of some necessary updates—a drawing module for their existed magento to better their services.

About the project:

The client need CCJK to develop the drawing function module for their existed magento as a necessary updates. In fact, this is considered to be a especially difficult programming task which include amazing script codes to realise the customized function for their users.

CCJK Solution:

Founded in the year of 2000, CCJK has been providing IT & Translation Solutions to organizations all over the world. There are graphics and website experts with the skill of excellent HD and attractive website designing. In the beginning, CCJK sale personnels would communicate effectively and patiently with our customers to fully understand what our customers need.

For this script development project, the sales try to get every small details clearly, the relative position for drawing, the font for add to pictures, even the style of drawing buttons. CCJK will design some parts to provide our client with excellent work, providing the client has no idea.

We choose two developers one of whom have more than 4 years of experiences over javascript and the other is skillful in html5 & script development.

In addition, CCJK is famous for its quick response to customer and its high quality to delivery. When the projects is ongoing, we keep contact with our client, report the progress to them regularly.

Before the deadline, we offer our client with the drawing module scripts which has already been intergrated to their E-shop.

In fact, through their unrimitting efforts and strong responsibilities, our customer is satisfied with our first draft. In fact, through our unrimitting efforts and strong responsibilities, our

customer is satisfied with our work.
