

NEW COMPANY PANTRY USES INTELLIGENT REFRIGERATORS TO SELL FRESH FOODS

Do you ever think of such a vending machine selling fresh fruits and vegetables? Now, a new company Pantry has made it come true.

Vending machines selling potato chips and beverage are commonly seen in our daily life, but do you ever think of such a vending machine selling fresh fruits and vegetables? Now, a new company Pantry has made it come true.

Pantry uses intelligent refrigerators instead of ordinary vending machine. Those refrigerators are placed in such locations with a large passenger flow volume as school, hospital and gym. Owners of these refrigerators can pack fresh foods and put then into the refrigerators which will automatically record the time those foods are put to ensure only fresh foods are sold and notify the owners to replace with fresh foods.

Actually, Pantry uses intelligent refrigerators instead of ordinary vending machine. Those refrigerators are placed in such locations with a large passenger flow volume as school, hospital and gym. Owners of these refrigerators can pack fresh foods and put then into the refrigerators which will automatically record the time those foods are put to ensure only fresh foods are sold and notify the owners to replace with fresh foods.

A modified Android pad installed on each refrigerator to support the payment by swiping card (using the RFID technology which enables users to payment with placing a card on the pad).
