

WHAT MAKES US EXCELLENT IN OIL TRANSLATION?

What makes us excellent in oil translation?

The world oil industry is in the process of dramatically internationalized develop ,at the same time, highly-increased requirements for documentation translation in oil industry caused by the development of oil industry, the International Conference of the petrochemical industry and downstream industries, Technology and Industry, the study report, investment analysis and evaluation, specification, contract and collaboration contracts, commercial development, downstream petroleum product procurement and tender, petroleum engineering project bidding, drilling exploration and technology development, the import and export of refined oil and oil multinationals site construction and updates, should be referred to the professional language vendors to deal with. Or else, the quality could not be assured.

All translators and reviewers from CCJK are native speakers with at least 5 years of professional experience and are quite fluent in both English and their mother-tongue languages. I have no doubt that their profound knowledge in both languages will be of a great asset to the project.

CCJK are always keeping pace with ever-changing oil industries. It is a specialty of CCJK Technologies. This industry could be volatile all the time, so we're always at the ready to accommodate your special needs, no matter how tight the timeframe is or anything else. We could deal with from research or test results to material data or safety sheets; we would
